ABOUT ME

Detail-oriented Junior Data Analyst and Computer Applications student at Manipal University Jaipur with hands on experience in Data Science, Business Intelligence Tools, and data engineering. Built end-to-end ML predictive models and automated multi-layer Data Pipelines to solve complex business challenges, including e-commerce RTO fraud detection and live Risk Analysis. Combines deep analytical rigor with robust Data Architecture and Relational Databases in Power BI and Web Frameworks like Flask. Adept at working with cross-functional teams to deliver strategic insights, backed by an Advanced Diploma in Computer Applications (ADCA) and corporate job simulations from Deloitte and Tata Consultancy Services.

SKILLS

Programming, Web Frameworks & Data Science: Python, Flask, HTML, CSS, JavaScript, Scikit-Learn, Machine Learning

Databases & Architecture: SQL, MySQL, Relational Databases (DBs), Multi-layer Data Architecture, Data Pipelines

Business Intelligence Tools & Analysis: Power BI, Advanced DAX, Power Query, Exploratory Data Analysis, Risk Analysis, Data Integrity

Developer Tools & Team Collaboration: Git, GitHub, VS Code, Jupyter Notebook, Cross-functional Team Collaboration

EXPERIENCE

Deloitte Australia | Forage | Data Analytics Virtual Intern | Jun 2026

- Executed forensic data analysis using advanced Excel functions to classify complex datasets, uncover anomalies, and extract actionable business insights.
- Engineered an interactive Tableau data dashboard to visualize key performance metrics, enabling data-driven decision-making for business stakeholders.
- Formulated strategic business conclusions based on rigorous data classification, simulating real-world consulting and technology operations.

Tata Consultancy Services | Forage | Data Visualization Virtual Intern | Apr 2026

- Spearheaded data visualization initiatives by designing executive-level dashboards (Power BI / Tableau) to translate raw client data into strategic business insights.
- Formulated targeted analytical queries and data-driven narratives to present findings effectively to client senior leadership during strategic alignment meetings.
- Streamlined complex operational data into impactful visual reports, directly addressing management requirements and facilitating effective corporate decision-making

PROJECTS

E-Commerce RTO & Fraud Detection Pipeline | Python, Machine Learning, Flask, MySQL Cloud

- Engineered an end-to-end Data Science and ML pipeline using Python and Random Forest (balanced via SMOTE) to predict high-risk Return-to-Origin (RTO) e-commerce orders.
- Developed a responsive Flask web application integrated with Vanilla JavaScript and Fetch API to process real time risk predictions without server reloads.

- Automated real-time data logging by configuring SQLAlchemy ORM to securely commit prediction data into an Aiven MySQL Cloud Database for continuous monitoring.

Financial Portfolio Risk & ETL Dashboard | Python, API, MySQL, Power BI, DAX

- Architected an automated ETL pipeline utilizing Python (Pandas) and the yfinance API to extract, clean, and transform live daily stock market data.
- Implemented a daily incremental load strategy via SQLAlchemy and Windows Task Scheduler to append fresh market data directly into a MySQL database.
- Designed an interactive Power BI dashboard leveraging DAX functions to visualize real-time ROI, 50-day moving averages, and 20-day volatility risk metrics.

OLA Data Operations & Business Analysis | Advanced SQL, MySQL, Window Functions

- Executed a rigorous data cleansing pipeline in MySQL, leveraging Common Table Expressions (CTEs) and Window Functions (ROW_NUMBER()) to identify and eliminate 22,000+ duplicate records.
- Analyzed 40,000+ validated ride records to extract actionable business insights regarding total revenue generation (13.7M+ INR), digital payment trends, and cancellation root causes.
- Optimized database integrity by standardizing date formats and handling missing values, significantly improving the accuracy of downstream time-series analysis and reporting.

EDUCATION

Bachelor of Computer Applications (BCA)

Manipal University, Jaipur | SCGPA: 8.5/10 | Expected Graduation: Sep 2027
